Triage

- is not treatment
- is sorting

Set up triage first

Set up treatment second
- away from triage
- open area for transport

Start where you are

1. Ask if person can respond
     a. Check airway
     b. Check breathing
          i. Above 30 – shock
          ii. Less than 30 – RED
          iii. Not breathing after 2 attempts – dead
2. Circulation
     a. Control severe breathing
     b. Capillary refill more than 2 seconds – RED
3. Mental status
     a. Give command with no response – RED

Green

Yellow – delayed

Red – immediate

Black - dead
